

IN THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of the claims:

1. (Currently Amended) A printer consumable for replaceable installation in a printer, the consumable comprising:

a printer interface end having a surface area upon which printer functional interfaces are arranged;

a user interface grasping end distal from the printer interface end, the user interface grasping end having a ~~reduced~~ cross-sectional area that is less than the surface area of from the printer interface end, wherein the user interface end is devoid of printer functional interfaces;

a handle portion integral with the user interface end;

finger stops integral with the handle portion-grasping end and positioned between the printer interface end and the user interface end, the finger stops extending outwardly from the handle portion, the finger stops having a combined surface area approximately equal to the difference between the surface area of the printer interface portion and the cross-sectional area of the user interface.

~~;and wherein the grasping end is devoid of printer functional interfaces.~~

2. (Currently Amended) The printer consumable for replaceable installation in a printer of Claim 1, further comprising a clear visual demarcation between the printer interface end and the user interface grasping end.

3. (Currently Amended) The printer consumable for replaceable installation in a printer of Claim 2, wherein the clear visual demarcation comprises the printer interface end and user interface grasping end being formed of materials having differing color, texture, or opacity.

4. (Currently Amended) The printer consumable for replaceable installation in a printer of Claim 2 further comprising a boundary between the printer interface end and the user interface grasping end, and wherein the clear demarcation comprises the boundary lying substantially along a plane.

5. (Currently Amended) The printer consumable for replaceable installation in a printer of Claim 1, wherein the user interface grasping end, the handle portion and the finger stops are ~~are~~ formed of substantially flat segments joined by rounded corners.

6. (Original) The printer consumable for replaceable installation in a printer of Claim 1, wherein the printer interface end further comprises a substantially flat face, and wherein at least a fluid port, an electrical interface, and a keying feature are positioned on the substantially flat face.

7. (Original) The printer consumable for replaceable installation in a printer of Claim 1, further comprising indicia of consumable contents.

8. (Currently Amended) The printer consumable for replaceable installation in a printer of Claim 7, wherein the handle grasping portion further comprises an outer surface;
wherein the indicia of consumable contents denote a color of a consumable content;
and
wherein the indicia comprises at least part of the surface area of the handle grasping portion of the consumable being substantially the same color as the color consumable content.

9-12. (Cancelled) .

13. (Original) The replaceable printing consumable of Claim 7, wherein the indicia of consumable contents comprises multiple indicia of consumable contents.

200206249-1

14. (Currently Amended) The replaceable printing consumable of Claim 13, wherein the handle ~~grasping~~ portion further comprises an outer surface;

wherein the indicia of consumable contents denote a color of a consumable content;
and

wherein a first of the multiple indicia comprises at least part of the surface area of the handle ~~grasping~~ portion of the consumable being substantially the same color as the consumable content, and a second of the multiple indicia comprises a written indication of the color of the consumable content.

15-18. (Cancelled)

19. (Currently Amended) The replaceable printing consumable of Claim 13, wherein the handle ~~grasping~~ portion further comprises an outer surface;

wherein the indicia of consumable contents denote a color of a consumable content;
and

wherein a first of the multiple indicia comprises at least part of the surface area of the handle ~~grasping~~ portion of the consumable being substantially the same color as the consumable content, and a second of the multiple indicia comprises a symbol.

20-49. (Cancelled)
